Supplemental Election/Restrictions

This supplemental Election/Restriction requirement is based on Applicants' amendment B (Paper No. 9), filed October 20, 2003, whereby the dependency of claim 64 was altered, hence moving claim 64 from the originally grouped Group I to Group II.

Based on this amendment, the new supplemental Restriction Requirement with the new Groupings is set forth, *infra*.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 37-53, drawn to a method of coating an optically readable data carrier.

Group II, claim(s) 54-64, drawn to an apparatus for coating an optically readable data carrier.

Group III, claim(s) 65-69, drawn to an optically readable data carrier.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group II includes the special technical feature of a laminating station, with, *inter alia*, an aligning unit, pressure rollers, etc. not set forth in either of Groups I or II, which is classified in Class 1569/584 and/or Class 156/538 of the US Patent Classification System, and in which Groups I or III are not.

Group I includes the special technical feature of, *inter alia*, withdrawing a protective film from an adhesive film prior to application of the adhesive film on a carrier surface, etc., which is classified in Class 156/238 or 156/250 of the US Patent Classification System, and in which Groups II or III are not.

Group III includes the special technical feature which sets forth a particular special technical feature of, *inter alia*, a protective housing which houses a positively claimed data carrier, etc.,

Art Unit: 2652

which is classified in Class 369/291 of the US Patent Classification System, and in which Groups I or II are not.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
